

Goals:

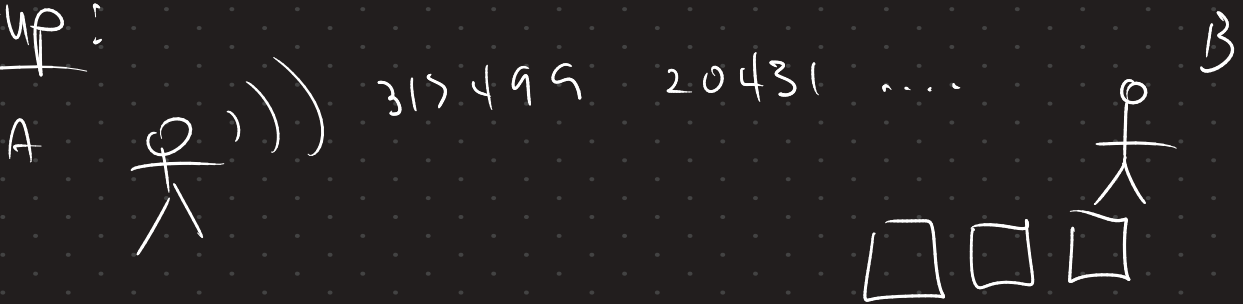

- Basic understanding of your computer.
(CPU, RAM, storage, filesystem...)
- Basics of programming.

Secondary goals:

- increase your agency over your computer.

Problem: finding the largest number.

Setup:

Rules + resources:

- + A few scraps of paper
- + pencil w/ eraser
- Only one # per scrap

— have to write down a # to remember it.

Procedure:

137901

Largest heard
so far

3311199

New #

- ① write first # on blue first
- ② listen, write # on green (erase if anything is there already)
- ③ if green # > blue #,
erase blue, copy green # to blue.
- ④ Repeat ②, ③ until out of #s.
- ⑤ Blue # is the largest.
